

BK893

Fully Automatic Dispensing Machine

- 1. Four control modes: manual, automatic, semi-automatic, and foot-operated, with manual light-touch control available.
- 2. Visual operation panel with digital adjustability.
- 3. Reserved external automation control port.
- 4. Dispensing time controlled by a timer, ensuring precise timing and consistent dispensing volume.
- 5. Capable of dispensing various liquids or materials, such as red glue, yellow glue, epoxy resin solder paste, silicone, and flux.
- 6. Adjustable air pressure, dispensing time, and nozzle size allow flexible control of dispensing volume and duration, meeting diverse requirements.
- 7. Equipped with a compact foot pedal control panel.

Specifications:

Power Supply Voltage	AC220V/50Hz
Output Voltage	AC18V
Maximum Power	20W
Adjustment Accuracy	0.01S
Dispensing Range (Adjustable)	0.02-9.99S
Weight	2.3KG
