

BK8586

Comprehensive maintenance station

1. Use C1321 pluggable heating element, which is convenient for heating element replacement;
2. The heating element is made of imported temperature-resistant materials with advanced technology and has a long life;
3. Air pump type air supply, rapid temperature rise and convenient temperature setting;
4. Adjustable air volume and temperature, suitable for dismantling all kinds of QFP, SOP, PLCC or SOJ chips;
5. After turning off the heating switch, the automatic cooling system starts to operate to prevent the heating element from overheating;
6. With Fahrenheit/Celsius display function;
7. After finishing the work, turn off the heating switch and display "----" to enter the standby state.

Specifications:

	Model	BK8586
	Output Power	760W
Host	Input voltage	AC230V/50Hz
	Working environment	-10-45°C
	Display form	LED digital tube
	Dimensions	L160xW95xH141mm
Spray gun	Handle wire length	120CM
	Air flow volume	120L/Min
	Temperature adjustment range	100°C-500°C
	Temperature stability	±3°C
Welding part	Temperature adjustment range	180°C-480°C
	Temperature stability	±2°C
	Handle wire length	100CM

Accessories:

BK907E handle

BK506A soldering iron stand
