

BK969S

Efficient digital display constant temperature soldering station

1. Wide voltage power supply 100-240V;
2. High-definition large-screen display, compact body;
3. New drive circuit design, high temperature rise stability;
4. The heating element is short-circuit protected, and the sensor is abnormal.
5. Password protection to avoid illegal modification of settings.

BK1321S heating core

900M soldering iron tip

Accessories:

BK 905 handle

BK515 soldering iron stand

Specification:

Intelligent lead-free soldering station	BK969S
Operating Voltage	AC100-240V,50/60HZ
Operating temperature range	200-480°C
No-load standby power	≤5 W
Maximum instantaneous power	60W
Temperature stability (no load)	±2°C
Resistance of soldering iron tip to ground	<2Ω
Potential of the soldering iron tip to the ground	<2mV
Dimensions	L128xW104xH79mm
Net weight/Gross weight	≈0.8Kg/≈1.0Kg
