Multi-functional signal generator

INTRODUCTION | 产品简介

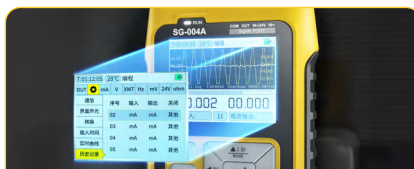

Signal generator is a high-performance device aimed at the industrial control industry. It can handle various working conditions with one device. The device has a simple but stable appearance design, simple operation logic and powerful performance, and has been loved by consumers since it was launched. Support voltage, current, frequency, thermocouple and other signal mode output and input, support independent 24V power supply, programming mode, real-time curve, historical record, MODBUS communication, firmware upgrade and other powerful functions.

信号发生器是针对工控行业推出的一款高性能设备，多种工况，一机搞定。该设备拥有简约而不失沉稳的外观设计，简单的操作逻辑与强大的性能，一经推出深受广大消费者的喜爱。支持电压、电流、频率、热电偶等信号模式输出与输入，支持独立24V供电、编程模式、实时曲线、历史记录、MODBUS通讯、固件升级等多种强大功能。

TECHNICAL SPECIFICATIONS

产品参数

Model
产品型号 Multi-functional Signal Generator
信号发生器 SG-004A

Power supply
电流信号 0-24mA

Size
产品尺寸 80*28*112mm

Display
显示规格 2.4-inch backlit color screen
2.4英寸背光彩屏

Charging
电压信号 0-24V

Built-in battery
充电规格 USB-C 5V-12V

Communication mode
通讯模式 Modbus slave
Modbus 从站

Other signals
其他信号 RTD, thermocouple
热电阻、热电偶

Power supply
供电方式 3000mAh rechargeable
lithium battery
3000mAh充电锂电池
