

Bakon TW-X15LBS Electric Screwdriver

Product Overview

Bakon Electric Screwdrivers are the preferred tool for industrial assembly, causing less contamination to the environment and requiring less maintenance. Power screwdrivers are selected based upon the torque control setting required. All models feature fully automatic shut-off, resulting in a motion close-down once the torque setting is reached.

Key Features

- High precision, super-large torque output: 3-15 Kgf.cm / 1.76-13.2 Lbf.in / 0.2-1.5 N.m
- Shank: Hex 1/4
- Low-voltage DC motor, safe and comfortable to use
- Brushless motor design
- Designed for repair work on production lines with minimal downtime
- Power supply included

Technical Specifications

Input Voltage: DC 30V

Torque Range: 3-15 Kgf.cm / 1.76-13.2 Lbf.in / 0.2-1.5 N.m

Torque Accuracy: $\pm 3\%$

Torque Adjustment: Stepless

Idling Speed (RPM): 1000

Weight: 450 g

No Load Current: 0.3A

Applicable Screw Diameter: Mechanical tooth: 2.0-3.0 mm / Self-tapping tooth: 1.6-2.6 mm
