

Desoldering Station

MTQ 915

Description:

The Desoldering Station designed for lead free desoldering especially. The quick heating and strong power are for convenient and clear soldering / desoldering all types of DIP components.

Reasonable structure, single hand operation and strong absorbing power can easily remove the residual solder from one-sided or two sided of the PCB.

The Desoldering iron gun is controlled automatically by the micro-processor.

The heating element is made of PTC and the sensor on the desoldering tip can control the desoldering temperature quickly and accurately.

Specification

Station

Power Supply	110-130V AC / 220-240 V AC
Power Consumption	80W
Vacuum Pressure	600 mm HG

DeSoldering Gun

Power Consumption	24V AC 80W heat up rating 130W
Temperature	180 deg C to 480 deg C
Heating Element	Ceramic Heater

ESD Safe , Lead Free

Spare Bits / Nozzles / Elements / Filters Available
